

ADOBE

Brand Voice & Tone Guidelines — For RAG Integration

MISSION

Changing the world through personalized digital experiences.

Adobe empowers everyone — from individual creators to global enterprises — to bring their ideas to life through creativity and technology. Nurturing creativity is at the heart of everything Adobe does, for employees as well as the individuals, businesses, and communities it serves.

BRAND BELIEF

No matter who you are, you want to stand out.

Adobe believes that creativity and technology empower everyone to reach their full potential. Whether you are an enterprise marketer, small business owner, creative professional, or just trying to create content for yourself, standing out is the key driver behind feeling successful and accomplished.

VALUES

Create the Future

Creativity is in Adobe's DNA. We constantly look around the corner to see what is possible. We are builders, makers, and inventors driven by deep empathy for our customers. We have the courage to disrupt the market through bold bets and ideas we turn into reality.

Raise the Bar

We aim high and play to win. We relentlessly focus on execution, celebrate excellence, and are intellectually honest about where we must do better. Our success is measured by the success of our customers.

Own the Outcome

We think and operate like owners. We take initiative, have a bias toward action, and assume ownership for end results — not just our part. We are decisive and learn from our mistakes.

Be Genuine

The ability to be yourself is core to who we are. We embrace and respect diversity. We always act with sincerity, integrity, and the highest ethics.

TARGET AUDIENCE

- Creative professionals — designers, photographers, video editors, illustrators

- Enterprise marketers and digital experience teams
- Small business owners and entrepreneurs using creative tools
- Students and emerging creators discovering their craft
- Anyone who wants to stand out through the power of creativity and technology

BRAND PERSONALITY

Human

We speak like people talking to people — no corporate speak. Approachable, genuine, honest. Our language is clear and jargon-free.

Inspiring

We strike an emotional chord. We are compelling, energetic, optimistic. We encourage action and believe the world is full of possibilities.

Progressive

We are forward-thinking and speak with conviction. We feel cutting edge and culturally relevant. We set trends — we do not chase them.

Creative

We are original, fresh, and modern. Open-minded and curious. Clever and unexpected. We demonstrate uniqueness in everything we say.

BRAND VOICE

Adobe's voice is conversational — people talking to people — no matter the product or the audience. Corporate speak is not who we are. Our voice is encouraging and smart with a touch of the unexpected. It is approachable and genuine. Casual and cool.

Our language is clear, approachable, and jargon-free so that we may create richer relationships with customers, partners, and employees. We speak and sound like humans.

TONE VARIATIONS

Confident (peer-to-peer)

Direct, assured, no hedging. Examples: 'Creativity is everywhere. Now Photoshop is too.' / 'Generative AI. This changes everything.'

Encouraging (tutorials, onboarding)

Supportive, warm, empowering. Examples: 'What will you dream up today with Firefly?' / 'Edit videos that are uniquely you.'

Enthusiastic (new features, product launches)

Excited but grounded. Examples: 'We can not wait to show you what's next.' / 'See what new can do.'

Aspirational (creator stories, community)

Emotionally resonant, future-focused. Examples: 'Five million followers. One big dream.' / 'The future is yours to imagine.'

Playful (social media, casual content)

Light, clever, unexpected. Examples: 'Use your words, please.' / 'Draw. Paint. Smile.'

DO THIS

- Speak in a conversational tone — human not corporate
- Be thoughtful and supportive of the creator's journey
- Be honest and sincere — never oversell
- Be inclusive — speak to everyone who creates
- Strike an emotional chord — connect with the human behind the work
- Feel energetic and dynamic — encourage action
- Be optimistic and forward-thinking
- Be original, fresh, and clever — surprise people
- Use sentence-style capitalization and end headlines with a period

NOT THIS

- Never use buzzwords or technical jargon
- Never be overly formal in delivery
- Never be arrogant, aggressive, or elitist
- Never be mundane or traditional
- Never emulate others or chase trends
- Never be derivative or vague
- Never speak about AI as a replacement for human creativity

WRITING ABOUT AI

Creativity is a human trait. AI promises real gains in productivity but does not replace the creative spark or aesthetic judgment of the individual. Always center the human.

DO: 'Imagine what you can do with AI.' / 'With AI tools, creativity has never been easier or faster.'

DON'T: 'The magic of AI.' / 'Experience the power of AI transforming your ideas into art.'

KEY MESSAGES

- Creativity is the most powerful force for change in the world
- Everyone has the potential to create — Adobe makes that possible
- We are drivers of the digital revolution — forever forward
- The right tools + right insight + right mindset = anything is possible
- Changing the world through personalized digital experiences
